[FreeStone Software, Inc. Teams Up With ContentKeeper Technologies](#)

FreeStone Software, Inc., a Denver, Colorado based software distribution company, has entered into a distribution agreement with ContentKeeper Technologies of Canberra, Australia. ContentKeeper specializes in developing state-of-the-art software products designed to assist corporate and government clients to better manage their organizations' access to Internet resources.

- ▶ ContentKeeper monitors non-business related web surfing...
- ▶ Manages non-business related file downloads, and...
- ▶ Controls pornographic and illegal internet content entering the workplace by blocking, coaching and/or password authentication.

ContentKeeper uses its own patent-pending, industry leading; Closed-Loop Collaborative Filtering Technology™ to ensure that the database of non-business related sites is superior in quality and coverage. ContentKeeper also employs Artificial Intelligence techniques and the latest in M.A.R.I.O.™ real time blocking and classification technology to catch new and previously unvisited sites.

For More information on ContentKeeper, contact FreeStone Software at 303.398.7016 or at [info@freestonesoftware.com](mailto:info@freestonesoftware.com)
