

ContentKeeper Advanced Reporting Module

Enterprise Internet and Email Monitoring

ContentKeeper Advanced Reporting Module provides comprehensive reporting on Internet and email usage for large and small enterprises, with support for *ContentKeeper Web*, *ContentKeeper Mail* as well as most popular firewall and proxy applications in a simple-to-use interface.

There are 3 Advanced Reporting packages to choose from – *Silver*, *Gold* and *Platinum*. These are designed so that your investment is specific to the type (and size) of reporting needs for your organization – so you only invest in the package that fits.

ContentKeeper Advanced Reporting Module has been designed to efficiently load and analyze gigabytes of data to a single workstation, providing an enterprise-scale monitoring solution and offering a completely automated reporting function for small and large organizations.

Preferred hardware requirements

- Pentium PIII-500 MHz or faster
- Office® 97, 2000 or XP (to run Microsoft® Word reports)
- Microsoft® Internet Explorer 6.0 SP1+
- Microsoft® MDAC 2.7+ (to use SQL loader).
- 15 MB HDD + 10% of log files imported. e.g. 10GB of log files requires 1GB of HDD space

Key Features

- Generates comprehensive reports in a choice of formats: Web (HTML), Word (Doc) and Excel (CSV) and **automatically** delivers these to business unit managers.
- Loads and analyzes gigabytes of data.
 - *Silver* – 2GB
 - *Gold* – 5GB
 - *Platinum* - unlimited
- Enables in-depth interrogation of *ContentKeeper* log file data.
- Analyzes many protocols such as web, telnet and FTP usage.
 - *Silver* - Web
 - *Gold* - Web, FTP, TelNet
 - *Platinum* - Web, FTP, TelNet
- Presents information clearly and concisely using charts.
- Includes task scheduling for "set and forget" data analysis.
- Features an intuitive user interface with a web-like look and feel.
