

**For Immediate Release...June , 2005**

## **FreeStone Software and GlobeSoft Execute Agreement**

Denver, CO. FreeStone Software, Inc. (FSI) and GlobeSoft have executed an agreement under which FSI will become an Authorized Reseller of GlobeSoft's products. The agreement initially identifies GlobeSoft's MultiNetwork Manager Software but is open to include other products that may be developed by GlobeSoft in the future.

MultiNetwork Manager is a software solution that supports secure laptop roaming through auto-detection of network settings and by its ability to store multiple location or situation-specific settings into different profiles.

"MultiNetwork Manager has truly become an indispensable tool for people trying to connect when moving between networks. Accordingly, we're both proud and pleased to add MNM to our security and filtering offers." said Dave Gonnion, President of FSI.

### **About FreeStone**

FreeStone Software, Inc. is an Independent Software Vendor (ISV) and distributor of server-based security and filtering solutions for the internet. Founded in February, 2002, FSI has continued to broaden its product portfolio with leading edge security and filtering solutions which are complimentary and which support a safer, less frustrating, more wholesome internet experience for all markets. For additional information contact FSI in Denver at 303-398-7016.

### **About GlobeSoft**

GlobeSoft is a Swedish-based technology driven company in the software arena. GlobeSoft was founded in 1998 and incorporated in 1999 by the three founders Fredrik Svensson, Magnus Ekeberg and Bengt Svensson. The core management team has backgrounds from companies such as Ericsson, Accenture, Cambridge Technology Partners, Jaakko Poyry with many years of experience in the deployment of profitable business systems.
