

For Immediate Release...June 3, 2005

FreeStone Software and Webroot Execute Agreement

Denver, CO FreeStone Software, Inc. (FSI) and Webroot have executed an agreement under which FSI will become an Authorized Reseller of Webroot's products. The agreement initially identifies Webroot's SpySweeper line of software but is open to include other products that may be developed by Webroot in the future.

SpySweeper Enterprise is Webroot's centrally managed, scalable solution for the enterprise that provides protection against malicious spyware, adware, and other harmful intruders. It detects and removes existing spyware and blocks new threats before they can infect a network.

SpySweeper is Webroot's award-winning client-based software for individuals and the SOHO market. Spy Sweeper's advanced detection and removal capabilities are effective at fully removing spyware that is notorious for being difficult to eliminate. Even the most malicious spyware programs are removed in a single sweep.

About FreeStone

FreeStone Software, Inc. is an Independent Software Vendor (ISV) and distributor of server-based security and filtering solutions for the internet. Founded in February, 2002, FSI's initial offering was ContentKEEPER™. ContentKEEPER™ allows organizations to monitor, manage, secure and control inappropriate internet use as well as bandwidth utilization. FSI offers security and filtering solutions that support a safer, less frustrating, more wholesome internet experience for all markets. For additional information contact FSI in Denver at 303-398-7016.
